

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

April 5, 2002

LB 1085

You're putting an economic embargo in on the poor, and saying you cannot partake into this legal substance. If we're serious about implementing a tax to prevent use, I don't know why we come up with 30 cents. If...if the intention of this tax is health-related reasons, why...why isn't it \$2.50 a pack, or \$3.50 a pack? I have a hard time with the philosophy behind this. And also, again, with regard to the poor. If you...in the evading of this tax, if you have transportation resources available to you, if you have the Internet, and credit cards, and so forth, you can purchase...you can evade this tax and purchase your cigarettes elsewhere. If you are, unfortunately, addicted to this substance and you do not have these resources available to you, you're caged...you're kind of caged, you're trapped. And all this is doing, all this tax does is traps the poor people of Nebraska, those that are unable to evade it. And it's just simply not a fair...fair process for...for those folks that I stand up for here on this floor of the Legislature.

SENATOR CUDABACK: One minute.

SENATOR SYNOWIECKI: And, Senator Jensen mentioned study after study, but I think I've got a lot of information here as well that counteracts a lot of the information. One real quick...Senator Jensen, if you would, submit to a question?

SENATOR CUDABACK: Senator Jensen, to a...

SENATOR JENSEN: Yes, Senator.

SENATOR SYNOWIECKI: Was this a bill that you introduced? Did it go through a committee hearing and so forth?

SENATOR JENSEN: Yes it did.

SENATOR SYNOWIECKI: Did it get out of committee?

SENATOR JENSEN: It was brought out of committee in the revenue package.

SENATOR SYNOWIECKI: Your specific bill did? What was the original bill number on this?
